The NAB needs to keep itself from being part of XM radio. I as a listener pay for the service, and if XM is trying to better my listening program they can. I enjoy the weather and traffic channel, because I benefit knowing where I need to go to avoid traffic jams and how the weather is going to effect my day. I pay to listen to what ever I want, and if someone has a problem with a channel or a programone can change the channel or discontinue listening. We pay for the service we should have the freedom to decide what we want to do. Thank You.
